ENIVA LIQUID VITAMIN D3

Eniva Liquid Vitamin D3 represents the very finest in nutraceutical innovation for providing high potency Vitamin D in liquid form.

Vitamin D, known as the **sunshine vitamin**, is an essential nutrient that is identified as a “**pro-hormone**” in the body. It **goes to work** at the DNA level in supporting multiple body systems to promote health.*

Evidence is clear that adults and children are not getting enough Vitamin D, even if they live in a sunny climate. Research also clearly shows that a deficiency of Vitamin D may increase the risk of various health challenges. Health professionals and health organizations are strongly supporting widespread Vitamin D supplementation for the promotion of health of both adults and children.*

Vitamin D has been found to support:

- *Healthy heart function**
- *Healthy cellular replication**
- *Healthy bones and muscles**
- *Healthy mood and mental health**
- *Healthy immune function**
- *Healthy neurologic function**
- *Healthy endocrine function—including blood glucose**

What makes Eniva Liquid Vitamin D3 different?

1. **Eniva Liquid Vitamin D3 is a natural, high potency, liquid Vitamin D nutraceutical** formulated by a medical doctor and nutritional expert. It contains “**bio-identical**” Vitamin D – known as Vitamin D3.
2. **Eniva Liquid Vitamin D3 is water-based** in a stabilized liquid delivery system to **enhance absorption, bioavailability and benefit to the body.***
 - **Vitamin D is a fat-soluble nutrient.** As such, it must undergo several steps for the body to use it properly. The Eniva Liquid Vitamin D3 product has already taken several of these initial body steps into account with its **advanced liquid delivery system.** This helps maximize efficient use and benefit.
 - **Eniva Liquid Vitamin D3 has an advanced water-based liquid delivery system** that is **pre-emulsified (pre-digested).** The natural oil from Vitamin D is “**fused**” with water to help maximize efficient use and benefit by the body.
 - **No binders, no fillers, no sugars, no stimulants:** The Eniva Super D3 is formulated without binders and fillers typically found in tablets and pills. Binders and fillers may interfere with the effectiveness of Vitamin D absorption.
3. **Great taste:** Derived from **natural flavors**, there are no “**questionable**” artificial colors or flavors added.
4. **Highest quality standards:** Extensive heavy metal, pesticide, contaminant, microbial and active ingredient testing have been done according to strict quality guidelines.
5. **Manufactured in the USA at an FDA inspected state-of-the-art nutraceutical facility:** Strictly compliant with US code of Federal Regulations (CFR 21) and strict manufacturing GMPs.
6. **Manufactured by Eniva Nutraceuticals:** People have trusted Eniva Nutraceuticals for over 10 years to deliver safe and effective nutritional products. **Eniva Liquid Vitamin D3 nutraceutical provides a science-based answer** for you and your loved ones.
